

Bed Bug Preparation List

****Please be prepared for all persons and pets to vacate the premises for 6 hours after the scheduled treatment time.***

****Pregnant and/or nursing women, and children under the age of 2 must be out for 24 hours.***

1. Please empty all dresser drawers and have all linens bagged.
2. These **bagged linens do not have to be laundered immediately.** However they must be, prior to placing them back in the drawers **after the second treatment.**
3. Please remove all clothing from closets, unless hanging. Ensure the closet floor is completely free of debris.
4. Please have all sheets and pillow cases removed from all beds (including sofa beds) and bagged.
5. **Please do not flip any furniture, particularly mattresses.** This can cause the bugs to scatter and hide elsewhere.
6. Please ensure all bedside tables (drawers) are completely empty.
7. All linens should be laundered and then placed in the dryer on **medium to high temperature for a minimum of 30 minutes.** If there is an item that cannot be washed, place it in the **dryer for 60 minutes** on medium to high temperature.
8. Vacuum all floor areas (carpet/hardwood) and dispose of bag immediately in an outside garbage bin.
9. Any bags/purses that have been used for travel over the last 6 weeks should be left out for treatment.
10. Wall units do not need to be prepared and may be left as they are.
11. Please cover any aquariums with a damp towel and have the pump turned to the off position.
12. Clear all kitchen counters of food and store it in the cupboard or fridge.
13. Empty any animal dishes (food/water).

****Please have your unit prepared the same way for your follow up treatment***

****Please contact us at 604-2-ON-SITE if you have any questions or concerns***
